

THE DANGERS OF RETRACTABLE LEASHES

- Dogs who are 10 feet away are not under control, even if they are on a leash.
- Dogs on long leads can dart into traffic and get hit by a car
- The retractable cord itself is a hazard and can severely injure people and animals.
- The locks can fail, resulting in complete lack of control of your dog.

**KEEP YOUR PETS SAFE ON
A TRADITIONAL LEASH**
